NIKEN

About Niken

Factory

Made in Türkiye

i

Our company was established in 1978 as a family company in the Automotive Electrical sector in Sirkeci, Istanbul, with the title of Oto Erbaylar.

While it continued to serve the entire Turkish market from Sirkeci within the framework of ethics, trust and respect with its many dealerships for years, it also took its first step into the Export market with the opening of the Aksaray branch in 1995.

Our company, which made its first import in 1996, has continued its breakthroughs in Import, Export, Production and Domestic Market with its professional work, experienced team members and constantly developing vision.

In 2000, it took one of the biggest steps in its development in the sector by moving its headquarters to an area of 4200 m2 in Yedpa Trade Center.

By obtaining the patent and usage rights of the Niken Brand in 2003, it has become a well-known, trusted brand in the sector and growing stronger day by day.

While Oto Erbaylar has continued to serve for many years with the superior quality, fast service, high satisfaction and effective marketing policies it offers to more than 2000 customers across Turkey from Yedpa Trade Center, the number of countries it exports to in the world has increased to 2019. 25.

Oto Erbaylar, which has experience in many different production lines from past to present, took the first step of its development in the Automotive Lighting Industry by establishing the Niken LED Headlight Bulbs production facility under the Niken brand in its 6,000 m2 facility in Yalova.

Niken Automotive has grown rapidly with its investments in research, development and new production technologies since its establishment; It maintains its leading position in its field of activity, aiming to shape the future with an innovative and dynamic perspective that captures market trends, without compromising its quality, stable and professional stance.

LED Miniature Bulbs

What is the
LED Miniature Bulb?

Car LED miniature bulbs are small sized light bulbs designed for use in automotive applications. These bulbs use light-emitting diode (LED) technology to produce light and are often employed in various parts of a vehicle or functions such as signaling, interior lighting, and accent lighting.

Made in Türkiye

12-24V

What is the
Standard Bulb?

Halogen car bulbs are a type of automotive lighting technology that uses a tungsten filament enclosed in a small quartz envelope filled with a halogen gas. These bulbs are commonly used for various lighting applications in vehicles, including headlights, fog lights, and other auxiliary lights.

10 ADAPTORS REAR WIPER Blade

What is the **REAR Wiper Blade**?

The rear wiper blade is a crucial but often overlooked part of a vehicle's overall visibility system. It is designed to ensure the driver maintains clear rearward visibility, especially in conditions like rain, snow, or dust, which could obscure the rear window and compromise safety.

Suitable for Specified Vehicles.

Parcel Information

- BOX: 1 PCS
- CTN: 50 PCS
- Size: May vary depending on wiper blade dimensions

WIRE WIPER Blade

What is the **WIRE Wiper Blade**?

When it comes to truck wiper blades, these are specially designed to handle the demanding conditions that trucks face—whether it's heavy rain, snow, dirt, or road grime. They differ from regular car wiper blades in terms of size, durability, and often the type of blade used, to ensure optimal performance on large windshields and under tough environmental conditions.

Suitable for Specified Vehicles.

Stainless Chrome Molding WIND Deflector

What is the **Wind Deflector**?

Wind deflector is an aerodynamic device installed on a vehicle, typically on windows. Its purpose is to redirect airflow, reducing wind noise and turbulence inside the car's cabin when windows are open. This can lead to improved fuel efficiency, lessened wind resistance, and a quieter ride for passengers.

**CHROME
STRIP
STAINLESS
STEEL**

Made in **Türkiye**

Suitable for specified vehicles

ARMREST Special to Car

What is the Armrest Special to Car?

A special armrest in a car typically refers to an armrest that serves a specific purpose or has unique features beyond a standard armrest. In most vehicles, armrests are located on the driver's and front passenger's seats and are designed to provide a comfortable place to rest your arm while driving.

Made in Türkiye
